

Small Changes Can Make A Big Impact

When every minute counts, small changes can have a big impact on your guest experience. With MOP by Visual Matrix, your housekeeping and maintenance staff always know what to do and when to do it. Here are some small touches to add to your routines that can make all the difference.

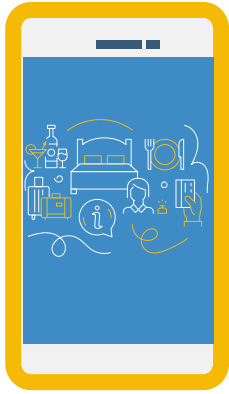

Tile and Carpet

For Room Attendants

- Mop floor tiles with a highly rated floor cleaner.
- During the daily cleaning process add a step to inspect

For Maintenance Staff

- Spray deep stains with a carpet cleaner or product like AWESOME.
- Place a damp cloth over a stained area and press it with a hot old iron. Steam helps lift out stains.

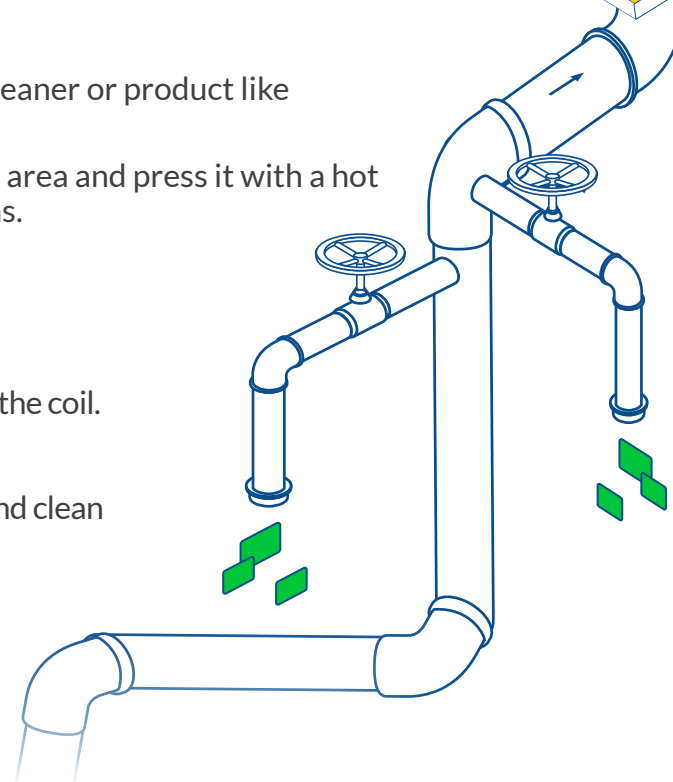

AC Coil

For Room Attendants

- Pull out and clean the vent to prevent dirt build-up on the coil.

For Maintenance Staff

- Create a preventive maintenance schedule to check and clean coils on a routine basis to prevent dirt build-up.

Bathroom Maintenance

For Room Attendants

- Report any problems with the shower head and waterspout, including the shower diverter.
- Check for issues with the toilet flushing, refilling, or if the seat is loose and report immediately
- Run water in the sink to test the stopper, ensuring it works to stop water and allows it to drain.

For Maintenance Staff

- Create a regular maintenance schedule to remove the tub drain plug and clear hair to prevent clogging.
- Create a preventative maintenance schedule to pull the exhaust fan cover and dust off the fan motor to help prevent a fire hazard.
